1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-14 and 45-48, drawn to a structure of a cured resinous material.

Group II, claim(s) 15-33, drawn to a method of forming a plurality of individual cells of a cured resin.

Group III, claim(s) 34-44, drawn to an apparatus for creating a structure comprising a plurality of cells of cured resinous material.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Since claim 1 reads on the foamed structures produced by the methods disclosed in the Arens et al. and Kagoshima et al references in that whether or not they disclose open or closed-celled cured foam each cell is inherently joined to each other (note claim 8, third full par.

of Kagoshima et al). The expression "special technical features" in PCT Rule 13.2 means those technical features that define a contribution which each of the claimed inventions considered as a whole, makes over the prior art.
